

A-level photovoltaic panel power generation

Overview

Solar technologies convert sunlight into electrical energy either through photovoltaic (PV) panels or through mirrors that concentrate solar radiation. Below, you can find resources and information on the. Solar photovoltaics (PV) is a very modular technology that can be manufactured in large plants, which creates economies of scale, but can also be deployed in very small quantities at a time. In the 1830s, British astronomer John Herschel used a solar oven to cook food during an expedition to Africa.
