

# Analysis of new energy storage market demand

## Overview

---

The global energy storage systems market recorded a demand was 222. 79 GW in 2022 and is expected to reach 512. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger utility-scale projects. 52 Terawatt by 2031, at a CAGR of 23. 05% during the forecast period (2026-2031). Growing demand for efficient and competitive energy resources is likely to propel market growth over the coming years. The Asia. The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours (MWh), year-over-year in 2024 and are expected to go beyond the terawatt-hour mark before 2030. Installations passed 100 GW for the first time - a.
