

# Belize s largest battery energy storage site

## Overview

---

The 10 MW of battery storage system, which is being developed at a BEL owned property behind the BEL Substation on Pescador Drive in San Pedro, is the first phase of a larger plan to deploy 40 MW of battery storage across the country. Belize Electricity Limited (BEL), in partnership with the Government of Belize and with funding from the World Bank, continues to work diligently on deploying a 10 MW Battery Energy Storage System (BESS) in San Pedro Ambergris Caye. The project will be developed at BEL's property behind the BEL. The new Belize Energy Resilience and Sustainability Project will deploy state-of-the-art battery energy storage systems across four strategic locations in the country, marking a significant step forward in modernizing Belize's energy infrastructure and reducing its dependency on electricity. The Project will strengthen the reliability and resilience of the national electricity system and enable greater renewable energy integration via the installation of four 10 MW Battery Energy Storage Systems (BESS). The Project is also focused on strengthening the electricity system's operational. Belize unveiled a USD-58. The new Belize Energy Resilience and Sustainability Project will deploy state-of-the-art battery.
