

Can I keep a fish tank in a locker

Overview

While it's generally not recommended to move a fish tank with the fish still inside due to the stress it can cause them and the logistical nightmare of keeping the water stable, it is possible with extreme caution and a very short distance. Here are some tips and tricks you might find useful when it comes time to store away your big fish tank: Make sure all of the water has been drained out of the tank before beginning the storage process. This will prevent any potential spills and make the tank lighter and easier to move. Clean the. Staying in a locker has got to be utterly miserable, not to mention the size of that tank. They're like dogs?

What?

?

As I explained, they love seeing their owners come close to the tank. I've had three bettas in the past years. My parents don't have room and it's not fully stocked so we're temporarily downsizing. Modern aquarium enthusiasts are pushing boundaries with: One aquarium designer in Dubai actually created a functional "underwater mailroom" for resort guests.
