

# Can solar tubes be used to generate electricity

## Overview

---

Despite their name, solar tubes do not generate solar electricity; instead, they harness the sun's rays to illuminate indoor spaces, providing improved visibility and potential health benefits from exposure to natural light. Understand solar thermodynamics, 2. Implement conversion efficiencies. They're most. The solar tube mentioned here is not to be confused with thin-film agri voltaic solar tubes and photovoltaic solar tubes which are mainly made for generating electricity. These daylighting systems capture and transfer sunlight indoors through reflective tubing.
