

Energy storage battery production in Barbados

Overview

Barbados is now leading the way in battery storage systems regionally, and will be a hub for the rest of the Caribbean. That's according to Minister of Energy and Business Development Senator Lisa Cummins. She made the disclosure as she led off Debate on the 2025 Appropriation. The Barbados National Energy Company Ltd. The tender process will open the door for developers to bid for up to 60 megawatts. Barbados has taken a significant step toward transforming its energy landscape with the launch of the Caribbean's first competitive Battery Energy Storage System (BESS) auction — a development that could redefine how renewable energy is integrated, financed, and scaled across island grids. Barbados is a step closer to launching its first procurement project for Battery Energy Storage Systems to support the grid and unlock stalled Solar PV connections. The Ministry of Energy and Business is currently hosting a three-day Procurement Design Workshop with key stakeholders to discuss and. This first tranche of the competitive procurement process aims to deploy 60 MW (240MWh) of new Battery Energy Storage Systems (BESS) in Barbados, aiming to unlock renewable energy (RE) access to the grid, improve grid stability, allow better demand management, and mitigate supply interruptions. The Government of Barbados has officially launched a major procurement process for the country's first large-scale Battery Energy Storage Systems (BESS), aimed at transforming the national electricity grid and unlocking delayed renewable energy investments. The launch event, hosted by the Ministry.
