

# Energy storage photovoltaics still growing

## Overview

---

In 2025, capacity growth from battery storage could set a record as we expect 18.3 GW of new battery storage. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. This amount represents an almost 30% increase from 2024 when 48.6 GW of capacity was installed, the largest. Storage deployment in the United States grew across all segments and is forecast to grow another 25% in 2025, according to Wood Mackenzie. Across all segments, including residential, commercial and industrial, and utility-scale, energy storage had year-over-year deployment growth in 2024.

### Global renewable capacity is set to grow strongly, driven by solar PV

Renewable sources of electricity generation are continuing to grow strongly around the world, with global capacity expected to more than double by 2030, according to the IEA's latest medium-term forecast.

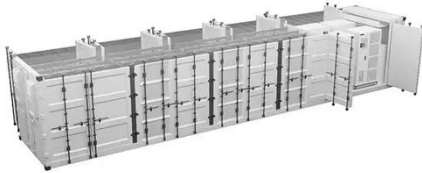

### Global Energy Storage Growth Upheld by New Markets

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow ...

## U.S. solar and energy storage poised for explosive ...

U.S. solar and energy storage are poised for significant growth in 2025. Explore the trends driving this transformation today!

## U.S. Solar Market Trends 2025 - Record Growth & Risks

Installers have adapted by bundling more storage and targeting higher usage customers, and a legal challenge could potentially improve economics again. Nationally, residential solar saw slightly slower ...

## How energy storage could solve the growing power crisis in the U.S.

How energy storage could solve the growing power crisis in the U.S. The opportunity is clear: with the right policy reforms, revenue mechanisms and investment frameworks, energy storage can deliver near ...

## US energy storage installations grow 33% year-over-year

Storage deployment in the United States grew across all segments and is forecast to grow another 25% in 2025, according to Wood Mackenzie. Across all segments, including residential, commercial ...
