

Estonia battery safety

Overview

As Europe rapidly shifts to green energy, Estonia has taken a historic step that could serve as a roadmap for safeguarding Ukraine's energy system. In the Estonian town of Kiisa, the largest battery park in continental Europe was officially opened. As a result, nearly 1 GW of capacity was lost within seconds. The park's owner. A disruption of the electricity connection between Estonia and Finland last week, which shook the regional power grid, was caused by the new Kiisa battery park which is set to open next week, Delfi news portal reported. These batteries become particularly dangerous when used or stored improperly. They contain flammable substances.
