

European home energy storage power supply prices

Overview

In H1 2023, the average selling price for these systems was EUR 1,332/kWh, while in H2 2025 it has dropped to EUR 711/kWh. These dynamics have made residential battery systems more accessible, attracting a broader customer base seeking relief from rising electricity bills. As renewable energy adoption grows across Europe, home energy storage systems have become a hot topic. Let's dive into what shapes the European home battery market. The European residential battery storage market under 20 kWh has remained resilient in 2025, with notable growth across mid-sized and emerging markets, according to EUPD Research's latest Electrical Energy Storage (EES) Report© Europe H1 2025.
