

# Finland solar Site Energy

## Overview

---

Read about solar power production, its costs and environmental effects and the project development of the solar power plant. Renewables Finland currently maintains three up-to-date lists and statistics that track the development of solar power in Finland. Solar power in Finland is contributing to the transition towards low-emission energy production. The total capacity increased by more than 300 MW over the year. Fingrid has estimated the installed capacity by using installation statistics published annually by Finnish Energy. Finland deployed 227 MW of utility-scale solar last year, according to figures from Renewables Finland cited in a report by pv magazine. The figure is a record for large-scale solar in a calendar year for Finland, taking the country's installed industrial-scale solar capacity to 352 MW.

## Finland solar Site Energy

### Rapid growth of solar power in Finland could crash summer electricity

Solar power is a key part of Finland's and Europe's green transition. Yet its rapid expansion may bring unintended consequences: a new study shows that large-scale deployment of solar power could drive ...

### Finland Solar Power 2025: Record Growth, Lapland's Largest Park

Finland's utility-scale solar capacity soared in 2025, adding a record 227 MW. The article covers major projects like Utajärvi, Europe's northernmost large-scale park in Simo, upcoming installations, and ...

### ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

### Solar power in Finland

Solar power in Finland is contributing to the transition towards low-emission energy production. Technological development, falling costs and climate goals have together accelerated the spread of solar ...

## Highvoltage Battery

## Finland adds 227 MW of utility-scale solar in 2025

Finland's large-scale solar capacity more than doubled in 2025, buoyed by the commissioning of the country's first solar projects larger than 50 MW. Another record year for ground-mounted

## Solar power production capacity rose to 1,000 megawatts

According to the preliminary data of the Energy Authority, at the end of 2023, Finland had approximately 1,000 MW of installed solar power production capacity, 936 MW of which was micro ...

## Solar Power in Finland: Growth, Subsidies & Future Goals

Explore the rapid growth of solar power in Finland, backed by EUR16.6M in subsidies. See how Finland's solar energy strategy is paving the way to carbon neutrality.

Rack Mounted

## Finland adds 227 MW of utility-scale solar in 2025

Official data covering Finland's smaller-scale solar installations in 2025 is yet to be published. Last June, the Finnish Energy Authority said Finland's cumulative solar capacity reached 1,247 MW by the end of ...

## Solar power projects in Finland

Read about solar power production, its costs and environmental effects and the project development of the solar power plant. Renewables Finland currently maintains three up-to-date lists and statistics that track the ...

## Solar energy in Finland

Solar energy in Finland is used primarily for water heating and by the use of

**114KWh ESS**
