

Firm renewable energy

Overview

To firm renewables is to convert this cheap but variable source of power into what we really want: a reliable supply of electricity, there when we need it. Big battery projects are one way to do it. Solar and wind are often called 'variable' renewable energy sources. Through our extensive O&M experience, we maximise the performance of hydro assets and their contribution to a net-zero future. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax credits and imposed new restrictions, pressuring early-stage wind and solar pipelines. Wind and solar investments in the first half of 2025 fell 18%, to nearly US\$35 billion (prior to the. Below you can find a list with information on 8 Private Equity Firms in the Renewable Energy Industry. This blog post can help you identify Renewable Energy Industry Private Equity Firms and other participants active in the M&A market today.
