

# Flexible solar panel foundation

## Overview

---

Concrete-free foundations allow for a 10kW system to be installed in as little as 4 hours, without the need for specialized equipment. Adaptable to any array size in increments of two panels. 5% efficiency for monocrystalline and 19% for CIGS technology, making them increasingly competitive with rigid panels while maintaining superior installation versatility. Application Value: While flexible. Ready Rack is a fixed-tilt, ground mount solar racking solution, featuring a 2-High portrait design with helical, ground screw, and ballast foundation options. The SunPower Maxeon® Solar Cell is the only cell built on a solid copper foundation. Flexible panels made with SunPower cells are resistant to power loss via cracking and corrosion, unlike conventional cells, which are much more likely to lose power when bent or subjected to a moist environment. Each of these solar panels present different levels of flexibility so you're going to want to choose one that matches your individual needs.
