

Grid stabilization panama

Overview

Panama's electricity landscape is entering a new phase of modernisation with a landmark \$300 million framework loan agreed between the EIB Global, the international partnerships and development arm of the European Investment Bank, and Naturgy Energy Group through its Panamanian. Panama's electricity landscape is entering a new phase of modernisation with a landmark \$300 million framework loan agreed between the EIB Global, the international partnerships and development arm of the European Investment Bank, and Naturgy Energy Group through its Panamanian. UAC country deep-dive reports are produced to serve as reference material to accelerate last -mile access. Reports consist of 3 components: Overview of electrification in the country, including history, current status, geographic & demographic trends, and future plans. The geospatial plans are not. The project will improve the reliability and efficiency of Panama's power grid, strengthening security of supply and access to electricity for households and businesses. The agreement contributes to the EIB Group's climate action and environmental sustainability goals.
