

# How big an inverter should I use for a 350W freezer

## Overview

---

For instance 350 watts plus 25% is 437 watts, but you won't find an inverter with that capacity, so your best option is a 450W to 500W unit. One we can recommend is the BESTEK 500W Power Inverter as it can run freezers without a problem. Can I run a freezer on an inverter?

What can I run off a 300w inverter?

What inverter do I need to run a microwave?

There are more, of course. This way, none of your appliances run the risk of being damaged. Pure sine wave inverters produce clean, stable. Knowing your AC power needs is key for selecting the right inverter. WattBuild's calculator lets you list the devices you want to power and then tells you the key stats you need to know, as well as showing which products on the market are compatible. Use the Add Device section to begin adding your.
