## Overview

---

Solar panel lifespan typically spans 25-30 years of productive operation, with many quality systems continuing to generate electricity for 40+ years at reduced but still valuable capacity levels, making them exceptionally durable, clean energy investments. Generally, a solar panel could function for 5 to 25 years after developing. Premium panels deliver superior long-term value: While premium panels with 0.25% degradation rates cost 10-20% more upfront, they produce 11. Most solar panels manufactured as of publishing last about 25 to 30 years.
