

How much electricity can a 200ah battery store

Overview

A 200Ah (amp-hour) battery stores 2.6kWh (128V) of energy, powering devices based on their wattage and runtime needs. For example, a 12V 200Ah battery can run a 100W fridge for ~20 hours or a 500W microwave for 2 hours. The Battery class (C10 or C20) indicates the discharge rate at which the battery's capacity is. To power a home with 200Ah batteries, the number depends on energy demand and battery voltage. A typical household consumes ~10 kWh daily (300 kWh/month). If calculated on a typical 12V system, the capacity is: $200\text{Ah} \times 12\text{V} = 2400\text{Wh}$ (2).
