

# How to connect photovoltaic panels to household electricity

## Overview

---

Connect the solar panels either directly to a power inverter and then connect it to the home grid, or connect the inverter to the battery and then to the home power grid. With solar technology becoming more accessible and affordable in 2025, many homeowners are exploring how to integrate solar power into their. With a grid-tied solar power system, you can supply electricity to your home through the local utility infrastructure. In some cases, you can even generate extra energy and sell it back to the utility through net metering. Install solar panels on your roof with the help of a professional or a do-it-yourself solar kit. You should try to supply about 5000 watts of power per day.
