How to tell if a solar panel is 12V or 24V?

The best way to know the solar panel voltage is through the manufacturer's datasheet. Usually, panels with 36 cells offer 12V, and 72 cells offer 24V. This is the maximum rated voltage under direct sunlight if the circuit is open (no current running through the). To ascertain the voltage (v) of solar panels accurately, various factors must be considered, including 1. Measuring open circuit voltage (Voc), 3. It represents the total voltage output of a series-connected array of.
