Selecting the appropriate mounting system is crucial, as it determines. Most homeowners should choose the Year-Round angle. Choose Winter only if you are off-grid and need to maximize charging during short days. Being 5-10 degrees "flatter" than perfect is often better for self-cleaning (rain washing) than being too steep. Solar. Solar panel installation costs range from \$15,000 to \$30,000 for an average American home, with a payback period of 6 to 10 years depending on your state's incentives and sun exposure., 4:12, meaning 4 inches of rise for every 12 inches of run). The average roof slope can range between 30° and 40°.
