Overview

This technical article covers numerous substation project design elements, lists the steps of the construction process, and examines the environmental impacts and impact mitigation strategies for power transmission and distribution substation projects. Procurement of Design, Supply and Installation of Primary and Secondary Equipment for selected Substations Country: Mongolia Submission date: 13 October 2023 Funding: KfW (BMZ 201465129; BMZ 201665009) Procurement No. Most projects suffer due to lack of capability. Content: The project has two components: Secondary equipment: Provision of new HMI and SCADA interface at four (4) substations. 1 million kWh Special permits: Power transmission, 220 kilovolt and higher power transmission lines, substations, repair, assembly, testing and adjustment, ancillary works and services, 4-110 kilovolt. Within the frame of power expansion project by Mongolian government/Ministry of Energy, the Electrical Power Station and Substation of 35/10 kW 1000kVA capacity and 10/0. 4 kV Electric Power Transmission Line Installation in Ikh-Uul soum, Khuvsgul Province. Solar Power System of 80 kW capacity and.
