

# Ireland Energy Storage Base Project Investment

## Overview

---

It is located at Poolbeg Energy Hub, where ESB – around 95% owned by the Irish state with the remaining stake held by its employees – is planning to deploy a combination of clean energy technologies, including offshore wind, hydrogen, and battery storage, over the coming. It is located at Poolbeg Energy Hub, where ESB – around 95% owned by the Irish state with the remaining stake held by its employees – is planning to deploy a combination of clean energy technologies, including offshore wind, hydrogen, and battery storage, over the coming. Surveyed ESI members using a standard template. Projects in the pre-planning stage were not cross-checked. The average project MEC is 64 MW. Summarised results into one slide deck with. Ireland's market for battery energy storage (BESS) is likely to continue to decline after a brief ramp up around six years ago. Where developers once had a degree of certainty as part of the DS3, its ancillary market services framework, changes to that scheme are causing major uncertainty among. Energy Storage Ireland's 2025 pipeline survey shows the potential of the energy storage sector in Ireland and Northern Ireland with nearly 10GW of storage in development. ESI surveyed its members using a standard template to gather information on the energy storage pipeline in Ireland and Northern. The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The Poolbeg. Eamon Ryan (centre) cuts the ribbon to inaugurate the 75MW/150MWh Poolbeg BESS, flanked by ESB's Jim Dollard (left) and Fluence's SVP and EMEA president Paul McCusker.

## Ireland Energy Storage Base Project Investment

---

### Ireland: ESB officially opens its latest battery storage project in Co

This battery energy storage system (BESS) project is the latest in ESB's pipeline of projects delivered at sites in Dublin and Cork which are part of its investment of up to EUR300m in the ...

### SSE Acquires 120 MW/ 240 MWh Battery Storage Project in Ireland

SSE Renewables, a developer specializing in renewable energy projects, announced that it has acquired the project development rights for a 120 MW/240 MWh grid-scale battery energy ...

#### Highvoltage Battery

### Energy Storage Practice in Ireland , EnergyPro

They balance renewable generation, support stability, and enable the 24/7 clean energy future we're all aiming for. But despite years of discussion and technical progress, Ireland's BESS ...

## Energy Storage Ireland Pipeline Survey 2025

Important to note that the pipeline results demonstrate the capacity in the storage sector and potential build-out. The results are not intended as a prediction as to what may occur. The results help identify ...

## Long Duration Energy Storage

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

## Why Ireland's 10 GW energy storage pipeline is delayed by revenue

"The fundamentals for storage are really strong in Ireland, because we're a relatively isolated system on the periphery of Europe. As we get to 2030 and Ireland starts building lots of ...

## Battery Storage

We currently have more than 300MWs of battery storage capacity in operation in

Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery

...

## ESB opens Ireland's largest battery storage facility

It is located at Poolbeg Energy Hub, where ESB - around 95% owned by the Irish state with the remaining stake held by its employees - is planning to deploy a combination of clean energy ...

## Energy storage is ready to deliver - Energy Ireland

These storage assets are needed to minimise renewable dispatch down, support the grid, reduce our reliance on fossil fuels and reduce Ireland's carbon emissions.

## Critical role of battery storage in Ireland's energy plans

Analysis being conducted by ESI suggests that Ireland is going to need up to seven times more energy storage

than what is being stored today. "That said, the Government does realise that,
