

Is it good or safe to add photovoltaic panels to an old house

Overview

Yes—it's possible, but it depends on the roof's structural condition. While age isn't always the issue, a roof with visible damage, leaks, or deteriorating materials can pose a risk to both the installation and the longevity of the solar system. While installing solar panels on any property comes with its own set of challenges, older properties require much more care before you can safely make the switch. And with a little prep work, they'll do it beautifully. Adding solar panels reduces electricity bills by generating onsite. Putting new solar panels on an old roof can lead to headaches later on once your roof needs to be replaced, but how old is too old to go solar?

Keep reading to learn why it's smart to make sure your roof is in good shape before you install solar panels and how you can tell if your home is ready.

Is it good or safe to add photovoltaic panels to an old house
