John goodenough obituary

John Goodenough Obituary

John Goodenough passed away at the age of 100. The obituary was featured in Legacy on J, and Austin American-Statesman on J.

John Bannister Goodenough

John Bannister Goodenough, who pioneered studies of magnetism, orbital physics, electronic and ionic transport in transition-metal compounds, and materials for energy storage, died ...

John Goodenough obituary

Well into his nineties Goodenough continued to work on a battery that could solve what is arguably the most pressing engineering problem of the 21st century: how to store the energy needed to power ...

John B. Goodenough, 100, Dies; Nobel-Winning

The University of Texas at Austin, where Dr. Goodenough was a professor of engineering, announced his death. Until the announcement of his selection as a Nobel laureate, Dr. ...

Obituary John Bannister Goodenough

John Bannister Goodenough (1922-2023)
Materials scientist and Nobel laureate who invented rechargeable lithium batteries.

John B. Goodenough, Lithium-Ion Battery Innovator, Dies at 100

J, John B. Goodenough, who shared the 2019 Nobel Prize in Chemistry for developing the lithium-ion battery, died on Sunday, J. He was 100.

John Goodenough, a battery trailblazer, dies at 100

(Bloomberg) -- John Goodenough, a pioneering researcher who helped transform lithium-ion batteries, died at

the age of 100 on Sunday. His inventions that helped develop modern ...

John Goodenough Obituary

Goodenough died on J, exactly one month short of his 101st birthday. He was an active technical contributor to the further development of batteries at The University of Texas at Austin until ...

Nobel laureate John B. Goodenough dies at age 100

John B. Goodenough, Virginia H. Cockrell Centennial Chair in Engineering at the University of Texas at Austin (UT Austin), and winner of the 2019 Nobel Prize in Chemistry, has died at age 100. "Working ...
