

# Kyrgyzstan Island Solar Power Generation Home

## Overview

---

Kyrgyzstan partners with the IFC to develop new solar power plants in Batken and Talas, aiming to power over 125,000 homes and advance its renewable energy goals. The Kyrgyz Republic is making significant strides in solar energy development. Under the agreement, Masdar would explore and invest in a wide range of renewable energy projects such as ground-mounted solar PV. In many parts of the world—including the western United States, South America, China, and India—glaciers are frozen reservoirs that provide a reliable water supply each summer to hundreds of millions of people and the natural ecosystems on which they depend. The. Other viable options for renewable energy development in Kyrgyzstan include generating heat from solar energy and biogas, and electricity from wind and solar resources; no projects so far exploit these technologies.
