

London china electric vehicle market

Overview

LONDON - Chinese automakers surpassed a 10 per cent share of Europe's electric vehicle (EV) market in June, marking a full comeback from tariffs set in place in 2024 by the European Union. Electrification and smart technologies have gained momentum, especially in the past five years, and lessons from the Chinese market can be extracted for. Manufacturers led by BYD captured 10.6 per cent of all EV registrations in Europe in June. As Europe strives to meet its 2035 zero-ICE sales target, can its industry keep pace, or will Chinese automakers take the lead?

In June 2022. Market Dominance Solidified: China's electric vehicle market has achieved unprecedented scale in 2025, controlling over 70% of global EV production with domestic sales exceeding 11 million vehicles in 2024, while market penetration has skyrocketed from 6.
