

# Long-lasting warranty for photovoltaic container products used in the catering industry

## Overview

---

Solar panels generally come with two warranties: The product warranty covers the equipment and typically guarantees at least 10-12 years without fail, and the power or performance warranty often guarantees at least 90% production at 10 years and 80% at 25 years. Our warranties provide peace of mind, enhance customer trust, boost satisfaction, and create new revenue opportunities. Check out in 140 seconds how you will benefit from our PV Warranty Insurance for up to 30 years. Our PV Warranty Insurance is straightforward and effective: manufacturers protect their ability to pay excessive warranty claims on modules for a period of 25 years (up to 30 years for glass-glass). Plus, this solar panel system comes with the industry's best warranty (see below). Reach out to our solar power pros today at (877) 616-2046 and have them give you a snapshot of the energy your gadgets use or check out the "typical power consumption" tab below to discover your power production. Customized configurations can take up to 8-10 weeks, with shipping times varying by destination. Do you offer after-sales support for mobile solar PV containers?

Yes, we offer comprehensive after-sales. A standard solar panel warranty should come with at least 10 years of protection, though many premium options now offer 25 or even 30+ years of coverage.
