

Luxembourg city environmental sustainability

Overview

The city aims to become one of Europe's greenest capitals by implementing a host of initiatives to make a considerable positive impact on the environment. Below is a comprehensive guide to the city's efforts in furthering the sustainable agenda and fostering green. With the "SuperDrecksKëscht fir Betriber®" initiative, the City of Luxembourg has adopted a modern approach to waste management as part of its environmental action plan – and one that is a critical element of the larger country-wide waste management system. Aimed at ensuring the continuous. Global warming, CO2 emissions, flooding, drought, the list goes on. The environmental dangers threatening our planet have become more and more extreme.
