

# Maintenance of communication equipment for base stations in Azerbaijan

## Overview

---

The newly established center in the shortest possible time will provide maintenance and repair of all types of stationary and mobile modern military communication equipment used by the troops. According to the instructions of the Supreme Commander-in-Chief, works are being continued to develop the capabilities of the Armed Forces' communication means, which are one of the elements of the modern and mobile army management. Our superior management, experienced resources and fast, flexible response to changing and challenging. It was stressed that taking into account the security measures, the satellite communication system, as an autonomous operating ground center, mobile and portable satellite communication facilities, mainly operates through the satellite of Azerkosmos OJSC. We offer a comprehensive selection and implementation of radio communication systems from the simplest 2-way. We are a leading provider of telecommunications equipment and services in Azerbaijan and neighboring countries, as well as a leading system integrator for design, implementation and maintenance of ICT solutions.
