

Maldives Schools Use Folding Container High-Pressure Type

Overview

The project aims to strengthen school resilience in the Maldives by improving Ministry of Education (MoE) guidelines for safer, climate-adaptive, and culturally appropriate school design and construction. Infrastructure for Resilient Island States (IRIS) is a flagship initiative of the Coalition for Disaster Resilient Infrastructure (CDRI) which aims to equip Small Island Developing States (SIDS) with knowledge, tools, and partnerships to build climate- and disaster-resilient infrastructure. Through the implementation of green school activities under the Fehi Madharusa framework (Green school framework), designed in partnership between the NGO Soneva Namoonaa, and the National Consultant and Research Director at Sustainability Frontiers UK. The report was drafted with technical guidance and oversight from ROSA's Climate Change and Education sections - Reis Lopez Rello, Regional Climate Change Advisor, and Jim Ackers, Regional Education Advisor with the support of Frank Van. Shipping containers are often used as storerooms for school supplies and furniture whenever the building undergoes a renovation. Some innovative schools also use them as an extension to existing brick-and-mortar buildings. This saves both time and money. A library or a laboratory inside modified. When the Japanese registered Hakone Maru set sail for the first time from Japan on Aug, on its voyage to Oakland, United States it was a giant step in maritime cargo transportation - especially the transportation of standardized box containers.

Maldives Schools Use Folding Container High-Pressure Type

Towards a Climate Resilient Education System in the Maldives
