

# Manufacturer outdoor solar power hub

## Overview

---

NEOSUN PowerHub is the lowest cost source of clean and reliable off-grid power for remote locations. It is a stand-alone, turn-key system that combines solar energy production with integrated energy storage in a readily deployable and easily movable form that's ideal for remote power. We have installed over 300 MW of energy-efficient solar systems and battery storage for homeowners and businesses – helping thousands build a better future. The newest evolution in home energy storage is here. It's the first to offer 12,000-watt bypass capability, enough to simultaneously run heavy appliances (like a dryer) and even charge an electric car. Bluetti does it again with a complete and powerful yet compact. The first 200 customers\* to place an order will become EcoFlow Elite200 Users. Please kindly note that shipments are expected to begin from mid-December, 2024. Recharge via 800W AC (4-hour full charge) or solar (8-13 hours with 1 panel, 4-6 hours with 2 panels).

## Manufacturer outdoor solar power hub

---

### Solar Hub: Weatherproof Solar Generator with 24/7 Internet

Stay connected anywhere with the RevoPower Solar Hub -- a compact, weatherproof solar generator with 24/7 internet access via integrated SIM router. Made in the USA, includes LAN ports, WiFi, ...
