

# Mogadishu hydrogen energy storage

## Overview

---

The Mogadishu project uses modular battery containers that can be scaled up monthly as demand grows. Key components include: Wait, no - this isn't just about storing sunshine. With Somalia's electricity access rate hovering around 33% [1], this 230MWh system could power 85,000 homes daily while cutting diesel. The Mogadishu new energy storage module bidding initiative marks a pivotal step toward sustainable energy solutions in Somalia. Energy storage containers have emerged as a game-changer, offering scalable and efficient solutions for industries and communities. In liquid hydrogen storage, hydrogen is cooled to extremely low.
