

# Mongolia environmental sustainability

## Overview

---

In recent years, the Mongolian government and local communities have implemented various initiatives to address pressing environmental challenges such as desertification, air pollution, and wildlife conservation. 1 million animals died, unable to burrow through snow to reach grass to eat. Amid these challenges, in April 2024, Mongolia announced a nearly \$200 million effort that aims to protect the country's landscapes while honoring generations of traditional knowledge and supporting sustainable. As the world prepares for three landmark UN Conferences of the Parties (Tri-COP)—focused on tackling biodiversity loss, climate change, and desertification—the harsh realities of these interconnected crises are deeply felt by the people of Mongolia. These challenges do not just pose isolated. Ulaanbaatar, Mongolia – In a significant stride towards sustainability, the EU funded SWITCH-Asia project Switching On the Green Economy (SOGE) team successfully secured the approval of five important environmental standards by Mongolia's Technical Committee on Environmental Standards on 3rd. The 2030 Agenda for Sustainable Development, along with its Sustainable Development Goals (SDGs), provide countries with an ambitious development agenda to leave no one behind. EGP's work in Mongolia is based on partnerships.
