

Myanmar power plant off-grid energy storage system

Overview

According to Solis, BESS is built to deliver efficient electricity from 8 a. The system has a 450 kilowatt-peak solar capacity and six hybrid inverters — with a total output of 300 kilowatts — that help convert energy into usable. Solis, a global leader in renewable energy, has successfully deployed an advanced off-grid Battery Energy Storage System (BESS) in Myanmar. This milestone project reinforces Solis' commitment to sustainable energy solutions and reducing dependence on traditional power sources.
