Overview

An Outdoor Photovoltaic Energy Cabinet is a fully integrated, weatherproof power solution combining solar generation, lithium battery storage, inverter, and EMS in a single cabinet. It delivers clean, stable power for telecom base stations located in off-grid or unstable-grid. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is. Keep your solar battery bank protected, organized, and ready for action with the EG4 BossBox Energy Storage Enclosure. SES offers a wide variety of large outdoor battery and electronics enclosures for emergency backup UPS and solar storage applications.
