

Onsite Energy Solar Charging Panels with Onsite Energy

Overview

Optimize your costs by generating power with on-site assets, while driving additional revenue from the energy you produce. At the same time, facilities across sectors are also requiring more electricity for the electrification of heating systems and installation of electric. Optimize energy costs, reduce dependence on the grid, and help meet sustainability goals with our integrated on-site renewable energy solutions. Onsite energy can encompass a broad range of technologies suitable for deployment at industrial facilities. This post was written by VECKTA's CEO and Founder, Gareth Evans for his blog Powering Profits. The distributed energy industry is reshaping how we think about power, empowering businesses, communities, and individuals to take more ownership of their energy. For each kilowatt-hour (kWh) the onsite solar asset produces, a kWh of consumption will be offset for a buyer of renewable energy, or offtaker.
