

# Photovoltaic Panels Notes

## Overview

---

This document summarizes the key components of photovoltaic (PV) solar systems. It describes how solar cells are connected together to form solar panels and solar arrays to generate electricity from sunlight. Hereby, we present the first version of our book *Solar Energy: Fundamentals, Technology and Systems* and hope that it will be a useful source that helps our readers to study the different topics of solar energy. It covers the topics that are treated in the three lectures on photovoltaics (PV) that. Ø what happens if orientation / exposure of the panel change Ø what happens for various types of light bulbs: LED, CFL, incandescent. Ø Measure Voc and Isc and discuss.
