

## Overview

---

There are three main sizes of solar panels to know: 60-cell, 72-cell, and 96-cell. Getting these dimensions right is the difference between an optimized, high-output system and a frustrating, inefficient. Photovoltaic panel column specifications and dimensions standard solar panel specification sheets are a two page affair. The key parameters are as follows: All of these are discussed below. The main parameters are generally set out in a section somewhere on the first page, as with the Trina panel: As you.
