

Photovoltaic panel moving tool for two people

Resistant to -20°C - 55°C high and low temperature.

Overview

The Solar Panel Caddy is a tool designed to assist with a safer and easier method to lift and carry modules around the job site and up ladders. Everyone can lift and tilt large solar panels, powered by vacuum technology. UniMove offers a solar panel lifter for every step of your processing operations.

Features: Gravity-Fed grip which securely locks under the panel. Solar Panels with a thickness of 32mm or less will require the Panel Caddy Spacer be added to the Panel Caddy in order for the tool to work properly. An installers visibility improves and stability providing for a safer work environment. The Mod. GEDA USA's is a leading solar panel lift distributor offering original Solarlift, also called a panel lift or PV panel lift, is an economical solution for the speedy and safe transport of photovoltaic and solar panels.
