19 INCH

Overview

Solar roof vents operate through photovoltaic panels that convert sunlight into electricity. This electricity powers quiet DC motors that spin fan blades. All you need is PV panels & you can generate electricity, no matter whether you are on a hike or in the comfort of your home. It includes solar-powered fans, lights, cell phone chargers, power banks, security cameras. A solar powered roof ventilation system uses the sun's energy to power exhaust fans that remove hot air from your attic. What's ahead: We've tested and researched the seven most effective solar ventilation systems. From attic fans to desktop fans, beating the heat is going to be a breeze this year.
