

# Photovoltaic plant panel work

## Overview

---

At a high level, solar panels are made up of solar cells, which absorb sunlight. They use this sunlight to create direct current (DC) electricity through a process called "the photovoltaic effect. " Because most appliances don't use DC electricity, devices called inverters then convert it to. A photovoltaic (PV) cell, commonly called a solar cell, is a nonmechanical device that converts sunlight directly into electricity.
