

# Photovoltaic power generation support construction marking

## Overview

---

The NEC690 Building Inspector's Guide is a set of reference materials developed for Building Inspectors and AHJ Officials as it relates to Article 690, of the National Electrical Code (NEC 2014) for Photovoltaic Warning Labels. The Guide also covers ANSI Z535. 4-2011, the standard for the. Proper solar PV system labeling is a non-negotiable aspect of any safe and compliant installation. For a master or journeyman electrician, correctly applying these labels is crucial for passing inspection and ensuring the long-term safety of first responders and maintenance personnel. Governed by. The following wiring methods and enclosures that contain PV power source conductors shall be marked with the wording "Photovoltaic Power Source" by means of permanently affixed labels or other approved permanent marking: (1) Exposed raceways, cable trays, and other wiring methods (2) Covers or. All labeling used outdoors must be engraved metal, durable vinyl labeling compliant with UL 969, or UV stabilized engraved plastic. This installer-focused checklist aligns with NEC intent across code cycles adopted by many Authorities Having Jurisdiction (AHJs). Use it to standardize field work, tighten your.
