

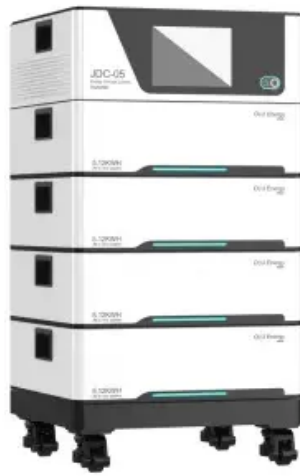

# Photovoltaic solar panels broken into pieces

## Overview

---

If you suspect solar panel damage, the first thing to do is contact the installation company or another qualified solar energy system repair outfit. The technician can accurately evaluate the type of damage and the extent of the problem. They're also the most vulnerable part when dealing with nature's elements. But, while lifting two panels with my tractor they became top heavy and slid and fell onto the tractor loader arms breaking the glass and almost penetrating through one of. Solar panels are built tough, and broken solar panels are rare. The solar cells, responsible for converting sunlight into electricity, are protected by a glass cover and aluminum frame. This current should still be usable, but your panel won't operate at maximum voltage. Designed to endure everything from power surges to hailstorms, they're built to last.
