

# Pyongyang portable backup power supply

## Overview

---

Implementing robust uninterruptible power supply systems remains crucial for Pyongyang's data centers to ensure operational continuity and data integrity. By combining advanced UPS technology with smart energy management, facilities can achieve both reliability and energy efficiency. Enjoy reliable surge protection. We innovate with solar photovoltaic plant design, engineering, supply and construction services, contributing to the diversification of the energy matrix in our. We provide operation and maintenance services (O&M) for solar photovoltaic plants. The PUB serves more than 57,000 people in South Tarawa, which has the highest demand at 24.7. The Pyongyang storage facility, operational since Q4 2024, uses lithium iron phosphate (LFP) batteries with 180MWh capacity - enough to power 60,000 homes for 3 hours during outages. In particular, to function as backup power during blackouts for instance. Request samples, conduct site visits, and communicate.

## Pyongyang portable backup power supply
