

Renewable energy growth cape verde

Overview

Recognising the imperative for change, Cape Verde has set a target to achieve 50% renewable energy penetration by 2030, with aspirations to reach 100% by 2050. Expanding renewable energy capacity and improving grid efficiency to reduce dependency on imported fossil fuels and lower energy costs are among several key “immediate priorities” that Cabo Verde need to address. In recent years, residential renewables have emerged as a beacon of progress, offering households a pathway to clean, reliable, and affordable energy. 3% in 2024, driven primarily by tourism recovery and the expansion of the services sector. This follows growth. Cape Verde, this archipelago nation off the coast of West Africa, is making a seriously impressive leap towards renewable energy.
