

Romania household energy storage subsidies

Overview

The Romanian Ministry of Energy launched a grant program funded by the Modernization Fund. It offers €150 million to support building battery storage systems connected to existing renewable energy sources (wind, solar, hydro). 5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local media reported, citing Minister of Energy Sebastian Burduja. These ambitious energy storage targets are aligned with transmission. The European Commission has approved, under EU State aid rules, a €103 million Romanian scheme to support the construction of electricity storage facilities. These batteries must utilize at least 75% of their energy from the. More than 60% of Romanians see the cost of storage systems as the main obstacle to purchasing and installing one, even though the vast majority of those interested consider green energy storage to be very important, according to a sociological survey conducted for the platform despre-energie.

Product Model
HU-ESS-215A(100KW/215KWh)
HU-ESS-115A(50KW/115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

State aid: Commission approves EUR103 million Romanian scheme

The European Commission has approved, under EU State aid rules, a EUR103 million Romanian scheme to support the construction of electricity storage facilities.

Public debate on 150 million Euro state aid scheme for energy storage

The Romanian Ministry of Energy has launched into public debate a new state aid scheme of 150 million Euros financed by the EU Modernisation Fund for investments in energy storage ...

Romania Launches EUR150 Million Battery Storage Investment Call to ...

Romania's Ministry of Energy has announced a new EUR150 million funding call under the Modernisation Fund to support investments in battery storage, enabling the use of renewable energy ...

Study: Over 46% of Romanians would invest in energy storage

...

The decision to invest in a storage system would be mainly influenced by state funding through government programs, as indicated by 46.3% of respondents. Bill savings would motivate ...

Application scenarios of energy storage battery products

Romania opens EUR150 million pot for co-located battery storage

Bids will be accepted until Janu. Under the scheme, grants will be available for battery storage systems built alongside existing renewable energy plants - wind, solar or hydro.

Romania launches EUR150 million battery storage grant

The Romanian Ministry of Energy launched a grant program funded by the Modernization Fund. It offers EUR150 million to support building battery storage systems connected to existing ...

Romania's ambitious energy storage plans: 5 GW by end-2026

Romania has allocated EUR 80 million under its National Recovery and Resilience Plan (PNRR) for energy storage projects, which is expected to result in contracts for a total of 1.8 GW of ...
