

# Saudi Arabian cement plant uses solar-powered containers for fast charging

## Overview

---

ENGIE, a global leader in low-carbon energy and services, has signed a Power Purchase Agreement (PPA) with Al Jouf Cement Company (AJCC) to develop a 22 MWp solar photovoltaic (PV) plant AJCC's cement facility located to the south of Turaif Governorate, which is in the. ENGIE, a global leader in low-carbon energy and services, has signed a Power Purchase Agreement (PPA) with Al Jouf Cement Company (AJCC) to develop a 22 MWp solar photovoltaic (PV) plant AJCC's cement facility located to the south of Turaif Governorate, which is in the. IRSC for Renewable Energy Solutions has signed a 30-year Power Purchase Agreement (PPA) with Arabian Cement Company (ACC) in Arabia, Egypt. Under the agreement, IRSC will develop, finance, build, own, and operate the second phase of ACC's solar power plant. The plant will have a total installed. Concentrated solar thermal technology offers a path to decarbonize cement by replacing fossil fuels with 1,500°C heat and simplifying carbon capture. The discourse surrounding industrial decarbonization often frames cement as an antagonist, a monolithic source of nearly 8% of global CO<sub>2</sub> emissions. The activity of the Arabian Cement Company and its subsidiaries is the production and trade of cement, building materials, related accessories and derivatives, and in order to achieve this purpose. For the cement and power industries, solar-powered carbon capture is an attractive decarbonization approach that uses renewable energy to increase the sustainability and scalability of CO<sub>2</sub> capture and use. Monterrey, Mexico and Zurich, Switzerland. Aug- Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the.

## Saudi Arabian cement plant uses solar-powered containers for fast

---

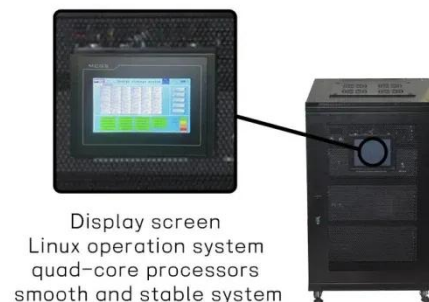

### Pioneering Solar-Powered Cement Production

This project aims to study conditions to maximize heat transfer to the raw cement mix, further advancing the cause of solar-powered cement production. The engineering industry and the world will watch ...

### Cemex and Synhelion make further progress toward the world's first

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially-viable levels.

### Design of solar cement plant for supplying thermal energy in cement

In the present work, the authors have attempted to design a solar cement plant for supplying solar energy to the cement industry. A case study was done, which investigated a ...

## Towards decarbonization of cement industry: a critical review of

Solar heating-based cement production is also reported to be capital investment intensive; however, it presents a low operational cost structure in the places where solar-power is abundant.

## Renewable Energy Projects Expand in Arabia

IRSC for Renewable Energy Solutions has signed a 30-year Power Purchase Agreement (PPA) with Arabian Cement Company (ACC) in Arabia, Egypt. Under the agreement, IRSC will ...

## CO2 pollution capture and removal from thermal and cement ...

This review provides a comparative assessment of how calcium-looping technology has been applied in fossil-based power plants and cement plants for CO<sub>2</sub> capture versus in solar ...

## Arabian Cement Company

Arabian Cement is the first cement

company in The Kingdom of Saudi Arabia and the entire Arabian Gulf.

---

## **Decarbonizing Cement Production Using Concentrated Solar Thermal**

The theoretical appeal of solar-powered cement has translated into tangible, albeit nascent, real-world progress. Pilot projects, such as the collaboration between CEMEX and ...

---

## **ENGIE and Al Jouf Cement Partner on 22 MWp Solar Project to ...**

With ENGIE's expertise in solar PV solutions, the plant will operate as a fully integrated system tailored to meet Al Jouf Cement's unique energy needs.

---

## **Saudi Cement , Power to build**

Power to build. Saudi Cement is the leader in the Saudi cement industry in

terms of efficiency, quality and profitability.
