

# Scrap photovoltaic panels

## Overview

---

Scrap PVs are broken panels that were cut off during the installation process due to customer requests or site conditions but still produce usable electricity. Waste from end-of-life solar panels presents opportunities to recover valuable materials and create jobs through recycling. According to the International Renewable Energy Agency Diverting solar panels from landfills to recycling saves space in landfills in addition to capturing the value of the. This has given rise to solar panel recycling companies, safeguarding the environmental benefits of solar energy from improper disposal. Let us explore the top companies in this business. They address the crucial need for responsible disposal and recycling as panels reach the end of their lifecycle.
