Is Balcony Solar Right for You?

What is Balcony Solar?

Balcony. With the widespread adoption of renewable energy, an increasing number of households are choosing to install photovoltaic systems on their balconies to achieve self-sufficiency in energy. A 400W system produces approximately 300-600 kWh annually depending on location and conditions. Solar power is available to most people, residences and budgets — right now! You might already be familiar with traditional rooftop solar arrays which are permanent and expensive.
