

Solar Thermal Storage Scam

Overview

Solar scams are fraudulent, misleading schemes used by illegitimate companies to sell overpriced or nonfunctional solar systems. They exploit the growing demand for solar by offering deals that seem too good to be true, pressuring homeowners into making hasty decisions or providing. Rather, when you pay your taxes, you can count your solar use as a credit that decreases your federal income tax. The Inflation Reduction Act was passed in 2022, and you should read about its clauses and specifics if you're thinking about committing to solar power. They typically use the same handful of tricks over and over—which means once you know what to look for, they're easy to spot. We'll walk you through the most common solar scams, the red flags that should make you pump the brakes, and how to find installers you. Industry experts Ellen Sirull and Emily Walker have shared common tricks and red flags to watch for with EnergySage that can help you protect your money and make a smart solar investment. The programs apply to people and homes that qualify.
