

Solar container battery classification label

Overview

These instructions have been specifically prepared for the shipment of lithium batteries fully regulated assigned to UN3090, UN3091, UN3480 & UN3481, in compliance with the provisions in P903 of the ADR 2025 (effective Janu). **DO NOT USE THESE SHIPPING INSTRUCTIONS FOR.** By developing new voluntary battery labeling guidelines, EPA seeks to increase consumer awareness of the presence of batteries in products and to empower consumers to properly dispose of them, depending on their local collection programs. Additionally, EPA aims to increase the proper identification. This guide provides scenario-based situations that outline the applicable requirements that a shipper must follow to ship packages of lithium cells and batteries in various configurations. Welcome We are happy you decided to ship with us. How can I tell if the battery is regulated?

Batteries normally have the size listed directly on the battery case which will help you identify whether or not it can be shipped without. The first step is to find out the PSN (Proper Shipping Name) for the energy storage system. However, with the development of.
